EXPERIENCE

From 10.2015 Android Developer at Dubizzle.com

Checked consistent performance and functionalities of Shedd application for Android to identify bugs, functionalities that are absent or incorrect, consistency issues, critical crashes and report it to developers so that they can be fixed on time and delivered. Responsible in changes for User Interface as per instructed by seniors. Developed knowledge and understanding regarding steps needed for android developer.

From 08.2014 Android Developer at Lourens Systems GmbH

My responsibilities are conceptualization, design, development and deployment of native Android applications according to current standards. My job also includes application testing, researching of various community libraries and working on improvement of performance and stability.

9.2013 –
07.2014 Android Developer at Weblify sp. z o.o.

As an Android developer at Weblify I was responsible for creating native android applications. Essential part of my job was frequent contacts with clients (communication in English) and customizing applications according to their guidelines. My responsibilities also included creating new features, bug fixing, testing, documenting, planning and distributing app to Google Play Store.
